Data Descriptions

It is important to note that G5 data are estimates only and not a true census count. This means that the G5 data cannot be directly compared to Federal Census data to determine if there was a change from one year to the next.

Data Sources

In addition to the G5 estimates and Statistics Canada data used in this publication, data from other sources are also included such as vehicle registration from SGI and school enrolment from the Saskatoon Public School Division and the Saskatoon Catholic Board of Education

It is important to keep in mind that both the Census and G5 data are simply "snapshots" of one moment in time and will never be current as of today's date.

Data Comparability

Where possible, *Neighbourhood Profiles* attempts to show changes in demographic and development data over time. In some cases, however, Statistics Canada has altered questions from previous Censuses making comparisons difficult with some data sets. Since the estimates provided by G5 use the same variable definitions as Statistics Canada, these issues also apply to the G5 data in this publication. It is important to note that G5 data are estimates only and not a true census count. This means that the G5 data cannot be directly compared to Federal Census data to determine if there was a change from one year to the next.

The following is an alphabetical list and description of the data used in the profiles:

Age of Dwelling
Source: Statistics Canada – Federal Census and City of Saskatoon Building
                Standards branch
Sample: n/a
Date: 2001; 2006
Description: This refers to the period in which the building was originally built, not the
                time of any later remodelling, additions or conversions. Respondents were
                asked to indicate the period of construction, to the best of their knowledge.
                G5 2006 estimates were not used for this variable because the estimates
                assigned dwelling numbers to time periods that did not correspond to
                historical neighbourhood development.

The number of new residential dwelling units in 2006 is included as a last line in this table.

Age Groups
Source: Generation Five
Sample: n/a
Date: 2006
Description: Describes the age and sex characteristics of Saskatoon's population through the use of a population pyramid.

Dwellings

Number of Dwellings
Source: Generation Five
Sample: n/a
Date: 2006
Description: Includes the number of dwellings per neighbourhood broken down by dwelling type. Dwelling is defined by Statistics Canada as a set of living quarters in which a person or group of persons reside.

Density of Dwellings
Source: Generation Five and the City of Saskatoon City Planning Branch
Sample: n/a
Date: 2006
Description: This measure is calculated by dividing the number of dwelling units by the gross area of each neighbourhood (acres).

Education Level
Source: Generation Five
Sample: n/a
Date: 2006
Description: Describes the highest level of education attained for those aged 15 years and older.

Ethnic Diversity
Source: Generation Five; Statistics Canada - Federal Census
Sample: n/a; 20%
Date: 2005; 2001
Description: The 2005 Diversity Index is calculated using the following index variables: Visible Minority, Mother Tongue, Home Language and Aboriginal Identity. Each of these index variables provides an insight into the minority populations found within the City. The 2005 Diversity Index is calculated differently than the 2001 Diversity Index. The 2001 Diversity Index only looked at the Single Ethnic Origin variable from the Census.

Each index variable (e.g. visible minority, mother tongue, home language or Aboriginal population) at the neighbourhood level is compared to the City level. The resulting number assesses what proportion of each group of people lives where, as compared to the proportion of the total City population. The Diversity Index is the sum of the individual indexes of the visible minority, mother tongue, home language and Aboriginal identity indexes.

Family Income
Source: Generation Five; Statistics Canada - Federal Census
Sample: n/a
Date: 2006
Description: Describes the average income characteristics of census families.

Family Structure
Source: Generation Five
Sample: n/a
Date: 2006
Description: Describes several characteristics of Saskatoon families and households. A household is defined by Statistics Canada as a person or group of persons who occupy the same dwelling and do not have a usual place of residence elsewhere in Canada. A distinction is made in the table between a family and a non-family household. A family household must have at least one census family.

Housing Costs
Source: Generation Five
Sample   n/a
Date   2006
Description   Describes the average gross rent and average owner's major payments for each neighbourhood.

Housing by Tenure
Source: Generation Five
Sample: n/a
Date: 2006
Description: Describes the type of housing tenure: homeowner or renter.

Housing Affordability Index
Source: Generation Five; Statistics Canada - Federal Census, City of Saskatoon City Planning Branch and Assessment Branch
Date: 2006

Description: This measure is an index of average household income for Saskatoon compared to the average house price for each neighbourhood. An index number above 1.0, for example, indicates house prices that are relatively more affordable than the city as a whole.

Licensed Home-Based Businesses
Source: City of Saskatoon Development Services Branch - Business License Section
Date: Year ending 2003 and 2006
Description: This figure represents the number of home-based businesses registered with the City of Saskatoon based on paid business license fees.

Major Occupations
Source: Generation Five
Sample: n/a
Date: 2006
Description: Describes the type of employment classification for population aged 15 years and older. These are the main categories derived by Statistics Canada to classify the Canadian labour force.

Mother Tongue
Source: Generation Five
Sample: n/a
Date: 2006
Description: Describes neighbourhood population by the first language learned at home. The top five languages are presented for each neighbourhood. **Please note that this estimate can be quite variable for certain neighbourhoods.**

Park Space per Person
Source: City of Saskatoon City Planning and Leisure Services Branches
Date: August 2005
Description: This measure is simply the number of acres of park space per person measured at a neighbourhood level. Park space includes all parks located within the boundaries of profiled neighbourhoods. The area (in acres) of each of park is also given. Park types are broken down into the following categories:

Neighbourhood Parks - Centrally located within a neighbourhood, these parks are designed for families, young children and informal use such as picnics. Any sports fields are free to users and may accommodate some intra-neighbourhood league play.

District Parks - Intended to serve four or five neighbourhoods, District Parks accommodate active and passive recreation, and may have a

8

particular emphasis on the athletic needs of high school students. There is a charge to book and use sports fields in these parks.

Multi-District Parks - As with District Parks, there is an emphasis on structured sports in Multi-District Parks. Sports fields are suitable for international competitions and there are booking charges associated with using these fields.

Special Use Parks - are citywide resources. Each park responds unique site circumstances and/or provides unique programming opportunities. The Forestry Farm Park, the Gordon Howe Complex, and Diefenbaker Park are examples of Special Use Parks. Most special use parks are not part of a residential neighbourhood.

Population
Source: Generation Five; Statistics Canada
Sample: n/a; 20%
Date: 2006; 1986-2001 Census
Description: Indicates population change based on available data.

Real Estate Sales
Source: City of Saskatoon Assessment Branch, from data supplied by the Province of Saskatchewan Land Titles office.
Date: Calendar year ending 2006
Description: This measure describes real estate transaction information for the 12-month period by housing type. This information does not include none-arms lengths transactions - for example, sales between family members.

The **Average Value of Dwelling** line at the bottom of the table is taken from **Generation Five (2006)**.

School Enrolment
Saskatchewan Institute of Applied Science and Technology Students
Source: SIAST, Kelsey Campus
Date: August 2006
Description: Represents the enrolment, based on Kelsey students 'term-time' mailing address for the 2004-2005 academic year.

University of Saskatchewan Students
Source: University of Saskatchewan Registrar's Office
Date: August 2006; December 2003
Description: Represents the enrolment, based on students mailing addresses of University of Saskatchewan students for the 2002-2003 and 2005-2006 academic terms.

Saskatoon Public School Division, Greater Saskatoon Catholic Schools
Source: Saskatoon Public School Division, Greater Saskatoon Catholic
              Schools
Date: July – August 2006
Description: Data for school enrolment was supplied by the above mentioned
              educational institutions. It should be noted that students enrolled in
              a school may not necessarily reside in that neighbourhood.

Vehicle Registration

Source: Saskatchewan Government Insurance
Date: August 2006; February, 2003
Description: The number of vehicles per resident in 2002 and 2005 is calculated by
              dividing the number of registered vehicles in a neighbourhood by the
              neighbourhood's population.

Voter Participation - Municipal

Source: City of Saskatoon City Clerk's Office
Date: 2000, 2003, 2006
Description: This measure breaks down voter participation in the 2000, 2003, and 2006
Civic Elections to the neighbourhood level. In most cases poll areas corresponded with
neighbourhood boundaries, but not all. The following pairs of neighbourhoods have
identical voter participation rates because they were serviced by the same poll for the
2006 election:

- Richmond Heights/North Park
- Holiday Park/King George
- Fairhaven/Confederation Park Suburban Centre
- Lawson Heights/Lawson Heights Suburban Centre
- Adelaide-Churchill/Stonebridge
- Eastview/Nutana Suburban Centre/Stonebridge
- Grosvenor Park/Greystone Heights
- Lakeridge/Lakewood Suburban Centre
- Erindale/University Heights Suburban Centre
- Arbour Creek/Willowgrove

Voter Participation - Provincial

Source: Province of Saskatchewan, Chief Electoral Officer
Date: August 2006; February, 2003
Description: Voter participation in the 1999 and 2003 Provincial Election is broken down to show neighbourhood results (where available). In most cases poll areas corresponded with neighbourhood boundaries, but not all. Where poll division boundaries did not correspond to neighbourhood boundaries, some approximation occurred. Affected neighbourhoods include:

Adelaide/Churchill	Kelsey-Woodlawn
Avalon	King George
Buena Vista	Meadowgreen
Caswell Hill	Mount Royal
Central Business District	Nutana
Confederation Suburban Centre	Nutana Park
Exhibition	Pacific Heights
Grosvenor Park	Pleasant Hill
Haultain	Queen Elizabeth
Holliston	Riversdale
Holiday Park	Varsity View
Hudson Bay Park	Westmount

Voter Participation - Federal

Source: Elections Canada
Date: 2000, 2004, 2006
Description: Voter participation in the 2000, 2004, and 2006 Federal Elections are broken down and combined to show neighbourhood by neighbourhood results (where available).
